

# Calling all patients, caregivers & community members!

We're looking for people to share their experiences and ideas on how to better involve patients in healthcare improvement.

In two **virtual** workshops, we will:

- Learn how patients and caregivers are already involved in improving healthcare.
- Explore how patients and caregivers can best contribute to a new approach called "Learning Health Systems" or LHS.
- Work towards **creating guidelines for stronger patient and caregiver involvement in LHS.**

WORKSHOP 1: APRIL 16, 6-8 PM EST

WORKSHOP 2: MAY 7, 6-8 PM EST

Virtual, Microsoft Teams
